STEP-BY-STEP APPLICATION GUIDE

- 1. Apply the glue in a thick even coat to both sides of the application area.**
 - a. You need enough glue applied so that when the two sides are pressed together, the glue comes in contact with itself on the whole surface.
- 2. Let air-dry for about 20-30 seconds.**
 - b. The glue should be still wet and not completely dry.
- 3. Press both sides of the application area together firmly.**
 - c. You have about 2-5 minutes before the glue dries to adjust the alignment of the application.
- 4. Let the glue dry. Your pieces will be ready in about 5-10 minutes with relatively good strength.**
 - d. Strength will continue to build for up to 24 hours

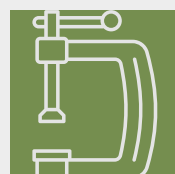

TIPS FOR BEST RESULTS

Apply generously!
You can wipe off
any extra.

It can take up to
24 hrs to be at full
strength!

No need for
clamping - it holds
itself!

SAFETY PRECAUTIONS:

- ⚠ We always recommend using gloves when applying chemicals.
- ⚠ Avoid skin and eye contact.
- ⚠ Do not eat it.
- ⚠ Wash your skin with soap and water if it comes in contact with the glue.
